Agency response

Columbia is a growing community with three large manufacturing companies (3M, Square D and Quaker Oats) and several smaller companies (American Air Filters and DANA, to name a few). There is a large state university and two smaller colleges in Columbia. Columbia's daytime population is greater than any other time of day with commuting workers. There is a large shopping mall and Columbia is the conjunction of two major highways (I-70 and Higher 63). There are also five hospitals in Columbia (Ellis Fischel Hospital, University Hospital, Boone Hospital, Columbia Regional Hospital and the VA Hospital).

Agency response

The Carthage Police Department would respectfully like to point out that we have many large industries in our city, including a nationally known poultry plant. These industries bring many good things into our area and we are proud to have them. However, many people that are contacted during traffic stops in our city are not legally in the United States. Carthage is attractive to non-legal citizens hoping to find employment. When these individuals cannot produce valid identification or driver's licenses, our arrest numbers and search incident to arrest numbers are skewed. In addition, a major state highway runs through our jurisdiction bringing many people of diverse backgrounds through Carthage.

RACIAL PROFILING DATA/2008

Agency: Caruthersville Police Dept.

Population: 4,577
age 16 and over

KEY INDICATORS	Total	White	Black	Hispanic	Asian	Am. Indian	Other

Agency response

The City of Chesterfield, Missouri is an upper middle class community in far west St. Louis County and lies at the crossroads of a major interstate highway (I-64) and Olive Street/Clarkson Road.

Located at this intersection is Chesterfield Mall, the major shopping center in this part of St. Louis County. The customer base at this shopping center has a significant number of African-American customers who reside outside the corporate limits of the City of Chesterfield. In addition to Chesterfield Mall, the world's longest strip mall/shopping center lies to the immediate west with several major interchanges approaching the Chesterfield Commons and exiting from I-64.

The City of Chesterfield workforce has a majority number of employees who reside outside the city limits. Since Metro Bus service is limited and in some cases nonexistent, these employees must drive to work. This increased traffic leads to more traffic congestion and ultimately to traffic law violations.

Agency response

The City of Clayton is the county seat for St. Louis County. It contains the courts, government offices, juvenile detention center and the St. Louis County Justice Center, which houses over 1,000 inmates. In addition, Clayton is the home of several major corporations and contains over 6.5 million square feet of office space and one million square feet of retail. It is estimated that over 80,000 people visit Clayton on a daily basis to work, shop or do business. Most of those visiting Clayton reside in the St. Louis Metropolitan area. Additionally, a number of major thoroughfares run through Clayton carrying commuters from various parts of the county requiring a significant amount of traffic enforcement: I-170, Forest Park Parkway, Hanley Road, Clayton Road, Brentwood Blvd., and Forsyth Blvd. Therefore, it is felt that for the purposes of this study, the racial makeup of the population should be in direct proportion to that of the St. Louis Metropolitan area. At the very least, the racial breakdown should be in line with that of St. Louis County as a whole, rather than the resident population of Clayton. If the racial makeup of St. Louis County was used, the disparity index for blacks in the City of Clayton would be 1.41.

Agency response

The City of Clinton is located on the main route between the Kansas City metropolitan area and the City of Springfield. As a consequence, a large number of non-Clinton residents pass through the City of Clinton. 39% of all traffic stops made by the Clinton Police Department take place on state highways. Given the number of non-resident drivers stopped on state highways for traffic violations, any comparisons utilizing the population of the City of Clinton are inherently flawed.

Agency response

The City of Crestwood is not a self-contained community but is part of a larger geographic region that contains the entire population of St. Louis County and that of St. Louis City. The City of Crestwood contains a major State Highway that is lined with businesses, eating establishments, grocery stores and Crestwood Plaza shopping center, a regional draw shopping center. The mall is also served by three different bus lines on the Metro system. The City of Crestwood also contains a portion of I-44. All of these influence the demographics of the driving public that we deal with.

While Crestwood has a Black population of 0.86 %, St. Louis County, in 2007, had a Black population of 21.8% and the State of Missouri has a Black population of 10.7%. To judge Crestwood's stop data based on our population provides for an inaccurate reflection of the driving public that our officers deal with. Crestwood's Black population does not reflect our region and our driving public.

Agency response

The City of Gladstone contains three sizable apartment complexes along a major thoroughfare through the City that serves as the principal connection to U.S. Highway 169, a well-traveled freeway that connects Gladstone to the City of Kansas City, and links our City to the Kansas City International Airport. Kansas City completely surrounds the City of Gladstone. These three apartment complexes offer government-subsidized housing that contains a disproportionate percentage of minority tenants.

The combination of freeway access, being surrounded by metropolitan Kansas City, concentrations of lower-income minority tenants in three apartment complexes, and the visitor traffic generated by these apartments attracts a higher percentage of minority visitors to Gladstone than the proportion of minority residents of the City would suggest. The Gladstone Public Safety Department has established policies to assure that minorities are not disproportionately subject to stops or arrests by our police officers. These policies are reinforced by active supervision of our law enforcement officers to assure that racial profiling or other discriminatory behavior does not exist.

Agency response

The City of Glendale is a bedroom community in the interior west county area of metropolitan St. Louis. We are at the mid point of four major shopping malls. We have one state highway with an average daily traffic count of over 30,000 vehicles. That number was greatly increased in 2008 due to the shutdown of Interstate 64, which parallels State Highway 100. We have two county arterial roads, both averaging over 10,000 vehicles per day. We are within a half-mile of Interstate 44, which allows for each access to St. Louis and the interstate system.

Agency response

The City of Hazelwood is a destination city for shoppers and employment. Hazelwood is home to approximately 1000 businesses employing over 25,000 employees. We have a 1.3 million square foot under roof shopping mall which attracts over 2 million customers annually. We have Interstate 270 which traverses the city with I-170 intersecting I-270. Each of these interstates carries over 125,000 vehicles per day. We have 3 major north-south arterial roadways through the city carrying over 100,000 vehicles per day. We have numerous minority visitors and motorists who visit and travel to and through the city.

Agency response

The Independence Police Department is an internationally accredited Police Department that does not tolerate racial profiling. Officers receive annual training on cultural challenges and issues. Last year, we purchased a program called "Law Enforcement Software Solutions" from Columbia, Missouri. This program is an accurate and accountable reporting of our traffic stops. Independence has a minority population that averages, according to the census report, approximately 2.38%. We do share our western border with Kansas City, Missouri. Independence has numerous State and Federal Highways which run through our city. Independence has become a major entertainment city, with I-70 being so close to this area of shopping, restaurants and entertainment, our traffic from other areas has increased. We are committed to ensuring we maintain the accountability and integrity of this process which indicates the level of professionalism within the Independence Police Department.

RACIAL PROFILING DATA/2008

Agency: Indian Point Police Dept.

Population: 567
age 16 and over

Agency response

Jasper County has a major University (Missouri Southern State University) and some colleges in the area (Ozark Christian College). We also have a large mall and several major businesses that employ people from the surrounding area (Kansas, Oklahoma). Some examples are: Conway trucking, Legget and Platt, Tri-State trucking, Butterball, Schrieber's, St. John's Hospital and Freeman Hospital. We also have several highways that run through our area – I-44, US 71, 96 Hwy, 43 Hwy.

Agency response

- The amount of searches at car stops decreased for Caucasians 2%, African Americans 4%, and Hispanics 8%. This shows that JPD officers are narrowing the gap for number of searches among the different races.
- Current analysis fails to distinguish between residents and non-residents who are stopped. The daytime population of Joplin is in excess of 270,000 while its resident population is around 50,000. The existence of significant proportions of non-resident stops lead to invalid conclusions if racial comparisons are made exclusively to resident population figures.
- The City of Joplin sits at a crossroads for Interstate 44 and Hwy 71, so numerous travelers pass through on a regular basis.

Agency response

Disparity indexes have not fluctuated significantly since the data collection began in 2000. However, these numbers should be interpreted cautiously. Specifically, relying on the census population for ages 16 and over as a benchmark does not provide a realistic picture of the driving population in Kansas City, Missouri at any given time. There are several major thoroughfares that run through the city, including I-29, I-35, and I-70 that contain a large percentage of drivers not reflected in the static census population used for comparison purposes. Additionally, Kansas City is contained within a metropolitan population of approximately 2.0 million, which adds to the commuter population on the major thoroughfares. Also, when examining search rates, the probable cause/authority to search reasons should be considered. By design, the form on which the AG office submitted the summary report did not include the new category Stop Outcome "Other," which accounted for 5,783 stops. The Total Stops figure, however, includes stops associated with this new category. Lastly, KCPD views vehicle stop data collection as one of many tools to address the issue of racial profiling. Other tools in use by the department include training, community programs, and policies.

Agency response

Kirksville is home to two major universities whose enrollment data is not totally reflected in the census figure. Truman State University and Kirksville College of Osteopathic Medicine account for an additional 6,000 students/residents (2009 numbers indicate that 19.3 of the Truman students are identified as other than white, and 96 percent come from outside Kirksville, including at least 309 international students). Kirksville is located on one of the few major north-south state highways (Highway 63) that service northern Missouri and southern Iowa. 8,700 vehicles per day travel the highway into and out of town. Kirksville is the largest city for miles and is the cultural/economic hub for a very large area. This expands the pool of those not counted in the city's census information.

Agency response

Interstate 70 borders the City of Lake Saint Louis to the north and U.S. 40/61 bisects the south end of the municipality, resulting in a fair amount of non-local traffic. Consequently, many drivers stopped for traffic violations in this venue are non-residents. Because of this, calculating a disparity index based on a comparison of ethnicity of drivers stopped with the ethnicity of the local population may be misleading.
