### Agency response

Arnold is by far the largest city in the county and offers more employment, shopping and recreational opportunities than any other city in the county. Interstate 55 also runs through the center of the city and serves as a corridor for residents of the city of St. Louis and many adjoining cities that have a large minority population. Out of 1,912 vehicle stops, only 27 (1.4%) were black. Because of the above facts and the city’s minute black population (.32%), the Disparity Index is not a true reflection of our proportion of stops to our population.

- Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).
- Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.
- The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.
- Search rate = (searches / stops) X 100. #Error indicates zero denominator.

**Notes:**

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100.  
#Error indicates zero denominator.

- Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.
- The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.
- Search rate = (searches / stops) X 100. #Error indicates zero denominator.

Agency response

The disparity index for Blacks in the report is not accurate based upon all the facts, and any characterization by way of inference that my department is discriminating is totally untrue. In support of our position we offer the following:

According to the 2000 Census, our City’s Afro American population of 18 year olds or older is 1.98% or 123 individuals. During the study period, the report indicated our department stopped 284 blacks, and since the study criteria is only based upon our City’s Afro American population in relationship to the number stopped. That meant that every one of our citizens was stopped at least twice. When in fact our racial profiling reports clearly indicate that only a total of four of our Afro American citizens were stopped by four different officers on four different occasions. Based upon this fact alone, its our opinion that the Afro American population figures of our City cannot be used solely without further consideration to determine if minorities are receiving disparity treatment. The City of Brentwood is located 3 miles west of the City of St. Louis and 2 miles south of Clayton, the county seat. The City’s static population is approximately 7,693; however, it swells to approximately 31,000 during the daytime, which is due to 750 business establishments, large shopping centers and an industrial park. The City is also the major crossroads between the
county seat and the City of St. Louis. Major highways and county arterial roads in the City are some of the most heavily traveled commuter routes in the metropolitan area. We believe these facts must be taken into account before any conclusions or inferences can be drawn from this racial profiling report, and ask that our response be included with your report.

## Agency response
Bridgeton has an extremely diverse business community with many large corporate employers, retail businesses and entertainment centers, located along side of an International Airport with two major interstate highways and two heavily traveled state highways. I feel that these factors account for the high disparity index.

**Notes:**

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100.

#Error indicates zero denominator.

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100. #Error indicates zero denominator.

Agency response

I find this reported summary, which is actually an attempt at analysis, to have the same mentality as the law itself; that is, if we can’t get it quite right, we’ll proceed anyway. Driving age figures are not yet available, so you have proceeded anyway with the percentages and figures as if they were factual when they are not based on the population total or the driving age total. You should have stayed with the total population figures or waited for the correct driving figures. As to our specific jurisdiction, we are home to several large, labor-intensive businesses that employ as many as 70% Hispanic workers. No one believes that the 2000 census counted anywhere near all of the undocumented population here. I firmly believe that the Hispanic population is two or three times what the census has reported. I presume that you have noticed that the searches themselves are, in some population groups, almost entirely in the “incident to arrest” category, an excellent indication that vehicle stops are not a pretext to search. I realize the AGO did not ask for this task. However, you have not made it better.

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100.

#Error indicates zero denominator.

### Agency response

The following are conditions that may impact our minority contacts:(1) Chesterfield Mall — a major shopping mall, located on 86 acres in the center of Chesterfield, has four major department stores and 140 smaller stores comprising 1.5 million square feet of shopping area.(2) Spirit of St. Louis Airport — The largest reliever airport in the state is also the second busiest in the state, and is within Chesterfield city limits.(3) 13 miles of Interstate 64/U.S. Highway 40 run through the city, virtually splitting the city into a north and south area.

### Agency response

The Village of Claycomo is home to a Ford Motor Company assembly plant. The company has about 5,000 employees. The assembly plant is located on 69 Highway, which runs through the city. The racial makeup of these employees is vastly different from the local population percentage. In addition, the Village of Claycomo is surrounded by two major interstate highways, I-35 and I-435. These are heavily traveled routes, which leads to officers contacting many drivers who are not residents of this city, and therefore not reflected in the local population percentage.

### Agency response

The City of Clayton is the county seat for St. Louis County. It contains the courts, government offices, juvenile detention center and the St. Louis County Justice Center, which houses over 1,200 inmates. In addition, Clayton is the home of several major corporations and contains over 6.5 million square feet of office space and one million square feet of retail. It is estimated that over 80,000 people visit Clayton on a daily basis to work, shop, or do business. Most of those visiting Clayton reside in the St. Louis metropolitan area. Additionally, a number of major thoroughfares run through Clayton carrying commuters from various parts of the county requiring a significant amount of traffic enforcement: I-170, Forest Park Parkway, Hanley Road, Clayton Road, Brentwood Boulevard and Forsyth Boulevard. Therefore, it is felt that, for the purposes of this study, the racial makeup of the population should be in direct proportion to that of the St. Louis metropolitan area. At the very least, the racial breakdown should be in line with that of St. Louis County as a whole, rather than the resident population of Clayton.

### Agency response

Clinton is located on the primary roadway carrying traffic from the large metropolitan areas of Kansas City and Springfield. In addition, Clinton receives a large influx of tourists due to its proximity to Truman Lake. Together, these factors result in a large transient population which may provide a different base population level. Additionally, some of these figures are so small that their statistical significance would be questionable.

Notes:
Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).
Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.
The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.
Search rate = (searches / stops) X 100. #Error indicates zero denominator.

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100.

#Error indicates zero denominator.

**Agency response**

The City of Creve Coeur is a “crossroads” in the St. Louis metropolitan area, having five major Interstate and State highways that pass through or are immediately adjacent to the city. Creve Coeur is home to numerous employers and businesses that hire and draw customers from throughout the region. While the disparity index may be perceived or at face value appear out of balance, the racial makeup of the region is a more reflective breakdown of motorists traveling within the City of Creve Coeur. The Afro-American population of St. Louis County is 19% and within Creve Coeur it is only 3.6%. Due to the large number of persons of all races and ethnicity that work, travel, and do business within our city, the racial makeup of motorists in Creve Coeur is reflective of a composite of the more racially diverse St. Louis County and St. Louis City region. The greater diversity of our city is also reflected in the daytime or workday population of Creve Coeur, which reaches upwards of 200,000 compared to the approximately 19,000 residents. In addition to the daytime population, Creve Coeur is ranked fifth in St. Louis County and seventeenth overall in the State for the number of traffic crashes. Two citizen surveys in the last five years reflect “traffic” as the #1 problem in the community. Police Department statistics show that 89% of traffic tickets written in year 2000 were issued to non-
resident drivers, thus indicating the largest percentage of motorists stopped is also more reflective of the general metropolitan area. The disparity index while appearing out of balance when considering only the resident population is very reflective of and in line with the population of the St. Louis metropolitan area.

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100. #Error indicates zero denominator.

**Agency response**

The population of Diamond is predominantly white. We are aware of only one Hispanic family and one Asian family. If the department stops more than two or three persons from these groups, then we are over-represented in the disparity index. The main road through the town is 59 Highway. This road is one of the few direct routes between Dallas and Chicago. There also is an elevated population of Hispanic individuals in the two towns directly to the north and south of us. There is a larger number of Hispanic individuals operating motor vehicles between Carthage and Neosho who travel through our town via 59 Highway, which is the only through highway that interconnects the two towns. Normally when police officers deal with individuals of different ethnic groups, their dispatchers only want to know if the person is black or white, due to the operations of the MULES terminals. Therefore literally if it is not apparent to officers what the nationality of a person is, then most officers would mark the white box as is untrue in this department. Our officers were instructed to mark the unknown race box when unsure.

**Agency response**

The population at the last census is 848. We have Interstate 70 which runs through Edmundson along with state highway 115, and are located across the street (I-70) from Lambert International Airport, which produces a large amount of traffic. We also have two hotels and the second largest rent a car company in the United States, Avis Rent a Car. All these factors produce traffic not associated with our population, which I understand affects our data in all areas of racial profiling.

**Notes:**

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100.

#Error indicates zero denominator.

#### Notes:

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) x 100.

#Error indicates zero denominator.

### Agency response

The City of Festus has a major interstate highway (I-55) that runs through the middle of our city. This interstate, which runs from Louisiana all the way up to Chicago, is traveled by several thousand people a day from different nationalities. We also have Rte. A that travels east and west that brings a lot of people into our area. Our city also has a Super Wal-Mart store that is visited by several people that are out of the area. It is the only Wal-Mart of its size in our county. Our city also has a wide variety of restaurants that are patronized by people who are traveling all of our thoroughfares.

Upon reviewing the data, I found that the numbers presented are generally consistent with information already compiled by our agency, in terms of total number of traffic stops, citations, warnings, locations, etc. However, I am concerned with the area of the report which reflects the population percentages of the various races who reside in our city. I specifically call your attention to the population percentages used to formulate the disparity index, which reflects that African-Americans are over-represented in total traffic stops made by officers of our department. While these percentages of the population probably accurately reflect African-Americans residing within our city limits, it unfortunately fails to account for the many others who spend time each day in our community. Agency response

Upon reviewing the data, I found that the numbers presented are generally consistent with information already compiled by our agency, in terms of total number of traffic stops, citations, warnings, locations, etc. However, I am concerned with the area of the report which reflects the population percentages of the various races who reside in our city. I specifically call your attention to the population percentages used to formulate the disparity index, which reflects that African-Americans are over-represented in total traffic stops made by officers of our department. While these percentages of the population probably accurately reflect African-Americans residing within our city limits, it unfortunately fails to account for the many others who spend time each day in our community. Additionally, numerous arterial roadways, such as county, state and even a portion of interstate highway service the city and provide access and travel routes for our citizens and neighbors. According to our statistics, it is these roadways
where the majority of our traffic stops occur. The City of Florissant prides itself as a culturally diverse community made up of vastly larger populations of minorities who use city services each day and are not accounted for in the official figures. The higher ratio of visiting population is due to significantly higher percentages of African-American citizens living in every one of our adjacent communities. These include the City of Berkeley (76.4%), the City of Black Jack (71.2%), the City of Dellwood (58.2%), the City of Ferguson (52.3%), the City of Hazelwood (16%), the City of Kinloch (95.8%), and Spanish Lake (54.5%), to name just a few. I would ask that you please consider this information prior to releasing the final report so that percentages are accurately conveyed to the public so that we may continue forging strong relationships within the community, especially with our minority citizens.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100.

#Error indicates zero denominator.

### Notes:

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100. #Error indicates zero denominator.

**Agency response**

Editor’s note: The Gladstone Department of Public Safety noted several statistical errors when it reviewed the original report. Those changes were duly reported to the statistical team, and the final report reflects those changes. Because of the statutory deadline of this report, however, the Gladstone Department of Public Safety did not have the opportunity for a final review of those statistics.)

### Agency response

Glendale is a bedroom community with five major streets. Manchester Road (State Route 100) is an east-west thoroughfare in St. Louis County and City. Berry Road connects with Interstate 44 half a mile south of town. Sappington Road connects with Crestwood Mall 2½ miles south. Lockwood Boulevard and Kirkham Avenue carry commuters through our town. Beside Crestwood Mall, there are three other malls within a five-mile radius. West County Mall to the west on Manchester; Frontenac Plaza to the northwest and the Galleria to the northeast. The City of Warson Woods is to our north, and they have a large shopping area which can only be reached by traveling through our town. Although our population is small, it is not an indicator of the number of vehicles that pass through our town on a daily basis. With regards to race, we have three neighboring cities with a larger black population: Rock Hill, Kirkwood and Webster Groves.

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100. #Error indicates zero denominator.

The information contained within this report indicates that the “Disparity Index” for stopping blacks in Grain Valley is 2.37, which indicates over-representation. It should be noted that of the 667 stops made by Grain Valley Police for the period being reported, there were only 8 blacks stopped. This equates to 1.2% of the total stops made; however, because of the number of blacks stopped and the small local population of blacks in Grain Valley (.51%), the “Disparity Index” calculation results in an over-inflated number. Additionally, Grain Valley has Interstate 70 that runs through the community with east and west bound exit ramps into Grain Valley where large numbers of motorists stop because of the three service stations/truck stops that are located adjacent to the interstate. Also, Grain Valley is located within the metroplex of Kansas City, the largest city in the State of Missouri, that has a relatively large black population. In conclusion, I don’t believe from the “Disparity Index” one can conclude Grain Valley police are targeting blacks as indicated by the raw numbers versus the Index figures.

**Notes:**

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100. #Error indicates zero denominator.

**Notes:**

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100.  

#error indicates zero denominator.

**Notes:**

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100.  
*#Error indicates zero denominator.*

### Agency response

The City of Hazelwood has three major highways within our jurisdiction: I-270, which travels through the city; I-170, which culminates in the city at I-270; and Highway 370. In addition, the city also has three major north/south arterial roadways through our city: Lindbergh Blvd. (US 67), Hanley Road, and Howdershell Road. The average daily traffic flow on these six roadways is approximately 300,000 vehicles daily. The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100. #Error indicates zero denominator.

**Agency response**

The above report indicates that the disparity index of 2.82 for black and 2.77 for Asian can be attributed to stops on U.S. Hwy. 54 that runs through Holts Summit. U.S. Hwy. 54 is a major corridor for travelers from St. Louis to Jefferson City and Lake of the Ozarks.

**Notes:**
Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).
Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.
The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.
Search rate = (searches / stops) X 100. #Error indicates zero denominator.

### Agency response

Comparing the traffic stop data with the resident population of a given political subdivision is meaningless. Comparing traffic stop data with the racial, gender and age breakdown of drivers actually on the road within that subdivision, if such information were actually available, would be the proper way to proceed. The Montgomery County, Maryland, Police Department has accomplished racial, gender and age data of drivers through their signal light photo enforcement of signal light violators. If Missouri approves photo enforcement, we would willingly assist in accomplishing this type of data gathering for the state.
