Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100. # Error indicates zero denominator.

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100.  

#Error indicates zero denominator.

Agency response

The report prepared by the Attorney General’s Office may provide an incomplete picture of traffic stop activities by the Joplin Police Department and other Missouri law enforcement agencies, by comparing individual agency traffic stop data against local jurisdiction demographics collected in the 2000 census. For those agencies whose officers are likely to encounter a high proportion of non-residents traveling through their jurisdiction, demographics of the driving population could be significantly different from the demographics of the agency’s resident population. A 1999 study for the City of Joplin, performed by the consulting firm Bucher, Willis and Ratliff Corporation of Kansas City, indicated that 28% of the vehicles entering Joplin each day are registered outside the state of Missouri, and that more than 7 of every 8 vehicles entering Joplin each day are garaged outside the city of Joplin. The presence of large employment, retail, commercial and medical sites within Joplin results in a daily service population in excess of 225,000, five times greater than the resident population. Until valid data on the demographics of “the population of minority groups residing or traveling within the jurisdiction” are generated, comparisons of traffic stop data to local resident population demographics could easily lead to erroneous conclusions about law enforcement activities. reported by the Joplin Police Department are compared to statewide population, as mandated by the statute (Section 590.650, RSMo), instead of to local population, the “Disparity Index” calculation results in a very different picture than that contained in the table presented by the Attorney General’s Office. When compared to statewide population data, the Joplin Police Department’s “Disparity Index” results are: White - 1.09, Black - .33, Hispanic - 1.09, Asian - .22, American Indian - .18, Other - .24.

### Agency response

The arrest figures combine data from two separate areas in the Annual Report to the Attorney General. This combined number may inflate the number of arrests since drivers arrested for a traffic violation may also be listed as an arrest with regard to a search. Second, the population figures used to determine the population percentage and the disparity index only includes drivers ages 18 and over. However, KCPD traffic stop figures include drivers of all ages. Many drivers stopped by this department are 16 and 17 years old. In addition, we also make numerous stops of unlicensed drivers who are younger than 16. We recommend that the disparity index be calculated using all drivers stopped.

- Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.
- The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.
- Search rate = (searches / stops) X 100. #Error indicates zero denominator.

**Agency response**

Interstate 35 runs through the center of Kearney with exits onto Mo. 92 where a large, high-volume truck stop is located. State highways 33 and 92 intersect in Kearney city limits just east of I-35. Within a five-mile radius of the city limits of Kearney are a large number of subdivisions that have a population of more than 18,000 people. Most of these people use the Mo. 33, Mo. 92 and I-35 routes on a daily basis.

The statistics appear to be representative of the area as well as the calls for service and citizen concerns. A large commercial development opened late fall/early winter in the area of Interstate 44 and U.S. 61-67, one mile east of Interstate 270. The development included large discount department stores, retail stores, fast food and restaurants. The influx of traffic to the new development was a major adjustment for the city. In conjunction with the new development, many residents were relocated during the construction phase and subsequent housing efforts. This relocation effort created a high percentage of these residents returning to the area to visit, attend neighborhood, church and family functions. Many of the car stops in the neighborhood/residential areas are in response to resident complaints and concerns regarding suspected drug activity, alcohol and gambling violations. This would be relevant when considering the high number of searches incident to arrest.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100.  
#Error indicates zero denominator.

**Agency response**

Ladue and its Police Department are dedicated to the equal and non-discriminatory enforcement of the law. The statistical “analysis” contained in the report is an improper basis for its calculations because it only uses the racial makeup of the population of Ladue and ignores the proper benchmark, the racial makeup of the motoring public driving in and through Ladue. Ladue has four major thoroughfares — Interstate 64, Interstate 170, Clayton Road and Ladue Road — that carry over 300,000 vehicles a day through the city. Most police encounters with motorists result from investigating accidents and enforcing traffic laws on these major roadways. A racial population analysis has not been performed of the drivers on these roads. Common sense indicates that this ratio would be more reflective of the racial composition of St. Louis County which, for example, shows an African-American minority population of 19% compared to Ladue’s 0.87%. If a proper basis for the study’s “analysis” were to be used, it would obvious that our department is fulfilling its mission of equal and non-discriminatory enforcement of the law.

**Agency response**

(1) Lafayette County has a major interstate highway (I-70) crossing our County; therefore, some of our traffic stops are not of our population.
(2) Lafayette County has a large transient farm worker population during the fall, as our County is a major supplier to the apple industry.
(3) Lafayette County has two major truck stop/travel centers located on I-70.
(4) Lafayette County has a large outlet mall located on I-70.

### Agency response

Lake Lotawana is a city in Jackson County, a first class county, with a population in excess of 660,000. Mo. Hwy. 7, a main thoroughfare between U.S. Hwy. 50 and Interstate 70, intersects our city on its west boundary. It is utilized by thousands of vehicles per day, and the only subjects stopped are those committing traffic violations through this corridor. At the time the vehicle is observed committing a violation, the ethnicity of the occupants is not known, especially at night time.

### Agency response

One critical consideration in the analysis of the data submitted by the City of Lake Saint Louis is the fact that Interstate 70 borders the venue on the north and U.S. Highway 40/61 passes through the municipality near its southern border. For example, it should be noted that 61.5% of the traffic stops initiated where the driver was black occurred on the Interstate and 14.8% occurred on a U.S. Highway. Out of 122 traffic stops where the subject was black, only 10 occurred on City streets. The information on stops and searches is being compared to the local population percentages, but the majority of the stops involving black drivers were not conducted on City streets. While the City has a relatively low minority population, that is not necessarily the case for the population traveling the highways. A critical consideration in evaluating search rate is the fact that no distinction is made regarding the reason a search was initiated. For example, in the case of searches conducted on black drivers, 10 searches took place out of 122 driver encounters. While this may appear statistically high, it should be noted that 7 of those searches took place incident to arrest. The practice of searching individuals who are placed under arrest is required not only for officer safety, but also to secure and safeguard the property of the individual being arrested. The arrests made in
these 7 incidents were made on outstanding warrants.

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100.  
#Error indicates zero denominator.

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100. #Error indicates zero denominator.

Agency response

The City of Lee's Summit is a suburban community of a larger metropolitan area, which enjoys a diverse population. The population of people involved in traffic stops is more representative of the metropolitan area than the city population. Lee's Summit Police share responsibility for an interstate highway and two major state highways, and employs people from the metropolitan area. The demographic of the traveling public is likely different than the resident population.

**Agency response**

According to your report, the City of Linn showed a disparity for two groups. Blacks received a disparity index of 1.97. Hispanics had a disparity index of 2.96. At face value, there might appear to be a problem. However, out of 87 stops, only one Black motorist was stopped and only two Hispanics. Due to the fact that these minority groups are under-represented in the local population, .58% and .78% respectively, any one member of such a group would represent a disparity if stopped. As you may know, U.S. 50 traverses the length of the City of Linn. This highway is often used as an alternate to I-70 for persons traveling to Kansas City and St. Louis, and as such, Linn receives a large amount of transient, non-local traffic that does not necessarily reflect the local population's makeup. In addition, there are several minority students who attend Linn State Technical College who were apparently not represented in your agency’s local population percentage figure. To use such figures to show an apparent “disparity” would be an unjust application of statistics. To be labeled a problem department because of three traffic stops that were initiated after officers had developed probable cause to believe a traffic violation had occurred would be simply ludicrous. Yet an uninformed person could draw the conclusion that such a problem exists. Such statistics show the inherent weakness
in the current format in which racial profiling data are compiled. In addition to interstate highways and local colleges where the student body’s composition may not be taken into account other factors are likewise ignored. When utilizing moving radar at night it is impossible to tell the race of the driver, not only because it’s dark, but also because you’re blinded by oncoming traffic’s headlights. However, the form suggested by your office for compiling data does not contain a space for the time of stop. Failing to look at the big picture will subject law enforcement officers to unjust and undeserving scrutiny.

**Notes:**
- Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).
- Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.
- The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.
- Search rate = (searches / stops) X 100. #Error indicates zero denominator.

### Agency response

The Disparity Index of 1.54 in black motorists would appear to be flawed, or at least not an accurate representation. A check of our 50 traffic stops show only 1 of 50 black motorists cited, or “.02%” resides within our boundaries. Yet, as I understand it, the City of Manchester’s population figures are used for these calculations. It seems to me, that perhaps a regional, or even a state-wide population would be more representative for all, be it white, black, Hispanic, Asian, American Indian or other. Also, only 19 or “1.6%” of the total 1,184 white motorists cited reside within our city. Other than the 1 black, no other races reside within our community. Therefore, 20 of the 1,280 motorists cited or “1.56%” reside in the City of Manchester. I am not trying to be flippant, but unless you have a captive population so to speak, such as the former Eastern Berlin communist countries, too many variables enter into the end product that this report endeavors to take into account to make it truly meaningful. Our community of 19,161 (2000 census) has 2 major state highways, i.e. 100 and 141, that some 100,000 cars pass along daily. With over 60 municipalities alone, within St. Louis County, in addition to St. Louis City, and unincorporated St. Louis County in our metro area, I am sure nearly all are represented by motorists who travel this route on a daily basis. Again, it is not clear what population
figure should be applied, but using a given community’s population as the basis, appears to skew the end interpretation result.

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).
Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.
The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.
Search rate = (searches / stops) X 100. #Error indicates zero denominator.

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100. #Error indicates zero denominator.

**Agency response**

Mexico, not unlike other cities in Missouri, experiences frequent non-permanent movement of persons from other communities. The cities of Moberly, Fulton and Columbia are all within 50 miles of Mexico, and inhabitants of Mexico have many ties to others in these communities. This has been the experience of our officers for many years in their contacts with the public. Clearly, one of the most basic flaws in this system is considering only the permanent population to establish a disparity index. While this index may reflect a very slight over representation, we do not believe that it is sufficient to establish a racial profiling concern.

**Notes:**
- Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).
- Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.
- The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.
- Search rate = (searches / stops) X 100. #Error indicates zero denominator.

**Agency response**

Milan has two food production plants. Con Agra and Premium Standard Foods. Both employ about 30% Hispanics. This population is continually leaving and others are arriving to work. Many are not making an effort to abide by city ordinances.

### Notes:

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100.

#Error indicates zero denominator.

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100. #Error indicates zero denominator.

**Agency response**

U.S. highway 160 and state highway 14 intersect inside our city. A large portion of our traffic includes major north/south (Springfield to Branson) and east/west bound traffic. We also have a Wal Mart Super Center inside our city limits which attracts a large amount of traffic.

Search rate = (searches / stops) X 100. #Error indicates zero denominator.

**Agency response**

It is significant that our community is located adjacent to an Interstate Highway with a major shopping mall and that nine of these non-white stops occurred on a state highway. It is obvious that ten non-white stops and one non-white search cannot be statistically or otherwise significant of any factors regarding racial profiling. This law has been so successful that I would propose that the members of the General Assembly also track data concerning their contacts with local constituents to ensure that racial profiling is not occurring.

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100. #Error indicates zero denominator.

The City of Osage Beach is in the heart of the Lake of the Ozarks recreation area. The 110 stores of the Factory Outlet Village mall also makes the city a regional shopping destination. The population expands from 3,075 year-round to well over 50,000 on the weekends, especially during the summer vacation season and fall shopping season. This influx explains the disparity between the local population and the drivers contacted and included in the racial profiling report for August 28, 2000 to December 31, 2000.
**RACIAL PROFILING DATA/2000**

**Agency: Osage County Sheriff's Dept.**

**Population: 9,625**

**Agency response**

There are two state highways that traverse most of the city. These highways link Parkville to Kansas City, Missouri and Kansas City, Kansas. The minority populations of these cities are significantly greater than either the minority population of Parkville or the state average. Parkville also has a university with a large minority enrollment most of who are not residents.

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100. #Error indicates zero denominator.

### Notes:

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100. #Error indicates zero denominator.

**Notes:**  
Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).  
Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.  
The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.  
Search rate = (searches / stops) X 100.

**Agency response**

Platte County is located in the northwest corner of the Kansas City, Missouri metropolitan area and has been ranked as one of the fastest growing counties in Missouri. With a total population of over 70,000 people, a large portion of southern Platte County is densely populated and falls within the city limits of Kansas City, while the northern portion of the county is more rural and is largely agricultural. Because of this agricultural base, Platte County has experienced an increase in the number of migrant workers traveling in and out of the county for employment purposes. In addition, Platte County hosts three separate interstate highway systems; I-29, I-435 and I-635, all of which serve as main thoroughfares to and from the Kansas City International Airport, which is located directly in the middle of Platte County. Platte County is bordered on the north by Buchanan County, to the west by Leavenworth County, Kansas and Kansas City, Kansas, to the south by Jackson County and to the east by Clay County.

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100.  
#Error indicates zero denominator.

**Notes:**

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100. #Error indicates zero denominator.

**Agency response**

Erroneous number of arrests for Blacks recorded by AG's Office. 7 Blacks were arrested instead of 11. Of the 7 arrested, only one was a Raymore resident. Raymore has the only 24-hour Wal-Mart Super Center in the region, which serves Belton, Grandview and parts of south Kansas City, which have more racially diverse populations.

### Agency response

Our city has several excellent resources that attract diverse populations of people to our city. We have one of the highest rated school systems in the area; 4-A rated. The boundaries extend beyond Raytown city limits into Kansas City, Missouri. We have several major highways and thoroughfares that run through our city. We are a hub for government services including a state run license bureau, a driver's license testing station, a county tax office, a public library and a U.S. government post office. We have a Wal-Mart store that serves several census tracts extending into Kansas City, Missouri. We have two major chain grocery stores on our borders. We have a multi-national corporation headquarters in our city. In addition to these factors several of my employees and I have been to sensitivity training, to diversity training, and to the Kansas City Mayor’s Summit on Race Relations. In addition, I have scheduled meetings with minority community leaders.

### Agency response

Riverside has a major High School with approximately a 2,000 student body the city also has a riverboat casino, a major interstate highway (I-635), which is a major highway from Kansas to KCI Airport. Riverside also has a major four lane state highway, M-9, from North Kansas City to Parkville, Missouri. Riverside has three large industrial parks which all have large businesses e.g. Riverside Seat Co., Woodbridge Foam, AT&T etc. Riverside west city limits is also the Missouri/Kansas state line and the Kansas county which is on the state line has a large black and Hispanic population. The Riverside Red X store is a large general store with some of the lowest cigarette and liquor prices in the area and draws a lot of Kansas residents to the area. Riverside is also one of the few cities in the area that allows the sale and discharge of fireworks, which draws persons from outside the Riverside area. It is estimated that Riverside’s daytime population is in excess of 10,000 persons because of all the above mentioned areas.

The Springfield Police Department does not condone any detention, interdiction, or other disparate treatment of any person on the basis of racial or ethnic status. The department is interested in any accurate and statistically valid means to measure racial profiling that might occur in the City of Springfield. The department is disturbed by the figures submitted to the Office of Attorney General but realizes there may be mitigating factors that have not been considered in this raw data report. As a result of the findings of this report, the Springfield Police Department is reviewing policy, training, deployment and further analysis of police operations as it relates to issues of disparity in traffic stop practices. The Springfield Police Department implemented a policy condemning and prohibiting the practice of racial profiling nine months prior to the passage of SB 1053 and we will ensure this policy and procedure exemplifies the best professional police practices. The Springfield Police Department provides significant academy training in cultural diversity issues and is expanding that training to provide specific instruction on avoidance of racial profiling practices. The City of Springfield has created a Police Citizen Appeal Board for the purpose of reviewing appeals of internal affairs cases by complaints. The Board will also address appeals of racial profiling incidents.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100.

#Error indicates zero denominator.

**Agency response**

As reflected in the report, 56% of traffic stops were made on a state highway, known as highway 180 or St. Charles Rock Road. This is the main street through St. John which is a direct link from St. Louis City, Wellston and Pagedale (predominately minority populated) and the Northwest Plaza Shopping Mall and other grocery stores. These are the first available shopping malls west of the city limits, which increases the amount of minority traffic who traverse the street.

While the number of persons stopped by police was fairly proportional by race, a greater percentage of black persons were searched by police (537, or 9.55% of those stopped) as compared to white persons (125, or 2.34% of those stopped.) A closer examination of the data concerning “probable cause/authority to search” reflects that the percentage of blacks searched for various reasons was higher than the rate for whites (e.g. the number of blacks consenting to a search (176) was greater than the number of whites consenting (47); also, the number of blacks searched incidental to arrest (255) was greater that the number of whites (45). This correlates to the number of those arrested for outstanding warrants (n: blacks: 281; whites 40). The first audit of the racial profiling data covered only a four month period. We will continue to closely monitor and analyze the data as it is collected.

### Agency response

While the data compiled in this report is informative, any conclusions drawn from the data must be tempered with common sense. For example, population data used to calculate the disparity index does not include members of the minority community that reside in the City of St. Louis and therefore, increases the diversity of drivers on the roads within St. Louis County. Nor does the data reflect that in a majority of traffic stops, police officers do not know the race of the driver prior to initiating the traffic stop. The St. Louis County Police Department has a long standing policy prohibiting all investigative detentions, traffic stops, arrests, searches or seizures of property based solely on race, ethnicity, gender, sexual orientation, religious belief, disability or economic level. All commissioned officers have participated in cultural diversity and sensitivity training and specialized training which prohibits the illegal practice of racial profiling. The St. Louis County Police Department will continue to gather and monitor the data required in this report to ensure our officers continue to respect the rights of every individual.

Agency response

The demographics of the driving population are impacted by the only large shopping mall in the county and the presence of Interstate 70 traversing the city. Additionally, state road 94 South impacts the driving demographics and will skew the data from the census data.

### Agency response

This police department during this time period was operating under a state grant to reduce fatal and serious injury accidents on a major highway in our city. As such, most of the traffic stops reflected in this report took place on that highway. It is very heavily traveled and the percentage of minorities traveling on that highway is in no way related to the minority population of this city. In addition, we sit between two major cities, Independence and Kansas City, Missouri, and receive traffic from both.
**RACIAL PROFILING DATA/2000**

**Agency: Sullivan County Sheriff's Dept.**  
**Population: 5,412**

**Notes:**

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100. #Error indicates zero denominator.

### Agency response

Three major highways, two federal and one state, crisscross the City of Town and Country. These highways carry an estimated 400,000 plus vehicles through our community daily. The intersection of I-64 and I-270 is reported to be the second busiest intersection in the state. Traffic crashes and other highway incidents account for a significant amount of personal injury and economic loss occurring within our jurisdiction and as well as a considerable amount of the police department’s workload and focus. The city’s police department is committed to making these highways, and the many other roadways within its jurisdiction, safe for all citizens. Analysis shows that the overwhelming majority of the department’s traffic enforcement occurs on these three major highway systems. Often, the city’s residential population is in the minority in comparison to others traveling through, visiting, worshiping or working within its boundaries. Additional analysis indicates that the overwhelming majority of traffic citations are issued to non-residents. It can be reasonably concluded that the racial makeup of those utilizing these highways is more proportionate to a combination of state, county and St. Louis City population and associated ratios than to the City of Town and Country proper. It is therefore our belief that the city’s police department activities are in harmony with both.
the provisions and intent of the State’s Racial Profiling Law requiring that vehicle stops be proportionate to the population groups residing or traveling within the jurisdiction of the law enforcement agency.

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100.  
#Error indicates zero denominator.

**Notes:**

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100. #Error indicates zero denominator.

### Agency response

The City of Warson Woods is primarily a residential community, however, Warson Woods has a large shopping district which is visited daily by thousands of customers. Leading into this shopping district is a major highway, (highway 100/Manchester Road.) Due to the daily volume being considerably more than the actual population of Warson Woods, one would expect that the Warson Woods disparity index would be higher that the arbitrary figure of one, that has been established.

### Notes:

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100.

#Error indicates zero denominator.

## Agency response

The City of Webster Groves is part of a major metropolitan area whose population travels daily upon our streets. A major interstate highway and several north/south feeder streets are included in our traffic network and are heavily traveled by non-residents in their commute to work and business. In addition, Webster Groves has several shopping and recreational areas that are heavily patronized by a large number of non-residents. This transient population is well documented in that the overwhelming majority of traffic warnings and citations are in fact issued to non-residents. Consequently, any statistical model wherein the resident population of the City of Webster Groves is the sole population used for analysis is seriously flawed.

Search rate = (searches / stops) X 100.  
#Error indicates zero denominator.

**Agency response**

Wentzville has two major Interstate Highways traversing its community. Interstate 70 and Interstate 40/61 (64) are heavily traveled and provide a transit population driving, working and shopping within the community. Also, within the city limits are two major employers, the General Motors Wentzville Truck Plant employing 2,695 people consisting of 853 minorities, and the Verizon Communications Company, which is a major employer hosting a large percentage of minority workers. Several other smaller companies with minority employee populations operate within the city and add considerably to the traffic population totals. Blvd style feeder roads such as the Wentzville Parkway, state Route A, Pitman Avenue and other local roads such as state route Z and Mexico Road provide high traffic volumes and traffic violation offenders which demand a considerable police traffic safety response.

- Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.
- The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.
- Search rate = (searches / stops) X 100. #Error indicates zero denominator.
